Skills

Programming Languages:

I am proficient in Python and JavaScript

Web Development:

HTML, CSS, JavaScript, and related frameworks like React

Database Management:

Experience with databases like MySQL and PostgreSQL

Version Control:

Proficient in using tools like Git for version control.

Problem-Solving and Critical Thinking:

Demonstrated ability to analyze problems and devise effective solutions.

Algorithm and Data Structures:

Strong understanding and implementation skills of algorithms and data structures.

Testing and Debugging:

Experience in testing and debugging code to ensure quality and functionality.

Object-Oriented Programming (OOP):

Proficiency in OOP principles and design patterns.

Frameworks and Libraries:

Familiarity with popular frameworks and libraries relevant to your expertise (e.g, Flask and React).

Collaboration and Teamwork:

Ability to work effectively in a team, communicate ideas, and contribute to group projects.

Communication and Presentation:

Strong verbal and written communication skills, including the ability to present ideas effectively.

Continuous Learning and Adaptability:

Willingness to learn and adapt to new technologies and programming languages.

Project Management:

Basic understanding of project management principles and tools.

Attention to Detail:

Ability to write clean, efficient, and maintainable code.

Soft Skills:

Time management, multitasking, problem-solving, and organizational skills.

Self-Motivation and Drive:

Initiative to take on challenges and drive projects to completion.

Projects

I have successfully completed various projects, encompassing both personal and collaborative endeavors. Notable among them are a weather app developed using JavaScript and React, a music app, and a hospital web application where I contributed significantly to the backend development. Additionally, I undertook the creation of a Google Drive clone, showcasing my versatility in handling diverse projects.
